

Laxman Sannu Gouda

LLM Engineer | Generative AI | LangChain | RAG Systems | Python

+917795288116 ◇ laxman.sg0104@gmail.com ◇ Karnataka, India ◇ [LinkedIn](#) ◇ [GitHub](#)

PROFESSIONAL SUMMARY

AI & Data Science final-year student with a strong focus on Generative AI, Large Language Models (LLMs), and Machine Learning. Experienced in building end-to-end AI systems including RAG pipelines and Agent-based architectures using LangChain, ChromaDB, and Groq LLMs.

Proficient in Python, SQL, and data analysis (Pandas, NumPy, Scikit-learn), with hands-on experience in conversational AI, real-time search integration, and document understanding. Familiar with Transformer architecture and fine-tuning techniques (LoRA/QLoRA – basic).

Seeking opportunities in LLM Engineering, Generative AI, and Machine Learning to build scalable, real-world AI solutions.

EDUCATION

BE in Artificial Intelligence and Data Science, SDM IT UJIRE (GPA: 8.76) Present

12th, Govt PU College Hiregutti (GPA: 8.41) 2020 — 2022

10th, Govt High School Belegadde (GPA: 9.02) 2019 — 2020

CERTIFICATIONS

[Python](#), hackerrank

[Complete Data Science, Machine Learning, DL, NLP Bootcamp](#), Udemy

PROJECTS

Conversational RAG Chatbot with PDF [Link](#) Jan '26 — Feb '26

- Developed a Conversational RAG (Retrieval-Augmented Generation) system using LangChain, ChromaDB, and Groq (LLaMA 3.3 70B) that enables users to upload PDFs and interact with document content through natural language queries.

Implemented an end-to-end pipeline including document ingestion, text chunking, embedding generation (HuggingFace), vector search, and history-aware conversational responses.

Deployed the application on Streamlit Cloud, providing fast, scalable, and context-aware question answering with multi-PDF support and real-time interaction.

AI-powered Search Agent chatbot using LangChain and Groq [Link](#) Dec '25 — Jan '26

- Developed an AI-powered Search Agent chatbot using LangChain and Groq (LLaMA 3.3 70B) that dynamically answers user queries by selecting appropriate tools such as DuckDuckGo Search, Wikipedia, and Arxiv for real-time information retrieval.

Implemented an agent-based architecture (ZERO_SHOT_REACT_DESCRIPTION) enabling intelligent tool selection, reasoning, and handling of API rate limits, along with a ChatGPT-style conversational UI using Streamlit.

Deployed the application on Streamlit Cloud, delivering fast, scalable, and interactive responses through seamless integration of multiple APIs and LLM-driven workflows.

LuckyCode-AI-Assistant-Gemini [Link](#) Oct '25 — Nov '25

- LuckyCode is an AI-powered coding assistant built using Google Gemini (Gemini 2.0 Flash) and Gradio, enabling code generation, debugging, and explanation across multiple languages (Python, Java, C++, JavaScript) using API-based inference without requiring local GPU resources.

It provides accurate reasoning and step-by-step solutions through an interactive web interface and is optimized for scalable deployment on Hugging Face Spaces, Render, and local environments.

SKILLS

Programming & Tools: Python, SQL, Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Linux (Basics)

AI/ML & Deep Learning: Scikit-learn, PyTorch (Basics), Regression, Classification, Clustering, Neural Networks (CNN, RNN, LSTM, GRU)

LLM & Generative AI: LangChain, RAG (Retrieval-Augmented Generation), Prompt Engineering, LLM APIs (Groq, Gemini), Transformers (Attention, Embeddings, Layers), LoRA/QLoRA (Basic), Vector Databases (ChromaDB)

Software Engineering Concepts : Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Soft Skills: Problem Solving, Teamwork, Leadership

Languages English, Kannada
